SUMMARY

Senior full-stack developer with 11+ years of experience building and maintaining production SaaS for teams in Australia, the US and the Philippines. Strong in Rails and Postgres-backed backends, third-party API integrations, background jobs, security work and framework upgrades, with front-end and mobile experience in Vue, Angular/Ionic and TypeScript. I use AI-assisted development (Claude Code) daily, write tests, and keep remote teams updated in writing.

SKILLS

Backend	Ruby, Ruby on Rails (6 → 8.1), Grape REST APIs, Sidekiq / Sidekiq Pro, PostgreSQL, MySQL, Redis
Frontend	TypeScript, JavaScript, Vue 2/3, Hotwire/Stimulus, Tailwind CSS, Bootstrap
Mobile	Ionic + Angular + Capacitor, Titanium/Alloy, native Android modules (Java)
Integrations	Shopify (GraphQL), QuickBooks Online, Amazon SP-API, Wix, Stripe, Braintree, Salesforce, HubSpot, Okta, Zendesk, Twilio, OpenAI, Google Cloud, six aged-care record systems
Security	TOTP 2FA, SSO (AWS Cognito, Okta), JWT APIs, fixes for pentest and bug-bounty findings (IDOR, CSRF, 2FA bypass)
Tooling	Docker, FlyIO, CircleCI, Firebase, Git/GitHub, RSpec, Minitest, Jest, Cypress, Claude Code

EXPERIENCE

Ruby on Rails Developer (lead developer) · TellTouch by LeeCare	Apr 2024 – Present
Melbourne, Australia · remote · aged-care feedback and compliance SaaS, plus LeeCare's mobile apps	
- Upgraded the Rails backend from 6.x to 8.1 one version at a time, and Ruby to 3.4, in production. - Built integrations with six aged-care record systems (AlayaCare, eCase, Manad Plus, TurnPoint, Telstra Health, LeeCare) that sync residents and push progress notes. - Added TOTP two-factor authentication, AWS Cognito SSO, admin impersonation and invitation-only onboarding. - Built a JWT-authenticated mobile/kiosk API and a separate TypeScript/Puppeteer PDF export service deployed on FlyIO. - Added OpenAI weekly summaries and audio transcription, with names anonymised before sending. - Maintain the Titanium iOS/Android kiosk app (v3.0 re-architecture, native Android audio module) and the Ionic/Angular P6 and MyCarePlan apps (dark mode, accessibility, native root detection).	

Ruby on Rails Developer · Flywheel by WPENGINE

Mar 2022 – Present

Omaha, Nebraska, US · remote · managed WordPress hosting platform

- Led the Ruby 3.4, Sidekiq 8 and Webpacker → Shakapacker upgrades on a large multi-engine Rails monolith, and contributed fixes to the Rails 7.2 upgrade.
- Migrated the customer-facing front end from Vue 2 to Vue 3.
- Fixed pentest and bug-bounty findings: 2FA bypass, IDOR, CSRF, race conditions and email-verification bypasses.
- Built Salesforce, Okta, HubSpot and Zendesk integrations, and worked on Stripe and Braintree billing flows.
- Maintained Coyote, the internal ACME/Let's Encrypt SSL certificate service.

Ruby on Rails Developer · Stocksmith (formerly Craftybase)

Jun 2023 – Feb 2025

Newcastle, NSW, Australia · remote · inventory and cost-of-goods software for makers

- Rebuilt the Shopify integration on the GraphQL Admin API, with cursor pagination and throttling.
- Built QuickBooks Online sync that exports cost of goods as journal entries.
- Stabilised Amazon SP-API order imports, added the Canada and Mexico marketplaces, and moved Wix to its newer Orders and Catalog V3 APIs.
- Wrote background maintenance tasks to repair affected customer data.

Earlier roles

2015 – 2022

CTO at Overcode Technologies; Software Engineer at RideHero and Appstone Tech. All small start-ups in the Philippines.

EDUCATION

BS Computer Engineering · University of Cebu – Main Campus

2015

LANGUAGES

English: advanced (C1), fluent in written and spoken work with Australian and US teams.
